The phenomenal success of Bill Gates and his Microsoft Corporation hinges, above all, on an ability to look to the future. Not content with holding a bulging share of the market for software applications, nor with dominating the crucial operating systems business by virtue of its DOS and Windows programs, Microsoft is always looking to the future. And the future for Microsoft now goes by the name of "Windows NT." A software innovation of the first order, NT could redefine the standards for computing throughout the world, into the next century. NT endows inexpensive personal computers with the capabilities of giant mainframes - yet without sacrificing the inherent flexibility and appeal of PCs.
