The Spirit of China: The Roots of Faith in 21st Century China David Burnett

China is an economic giant and influential part of the current world order. What drives its leaders, and what values do they hold? David Burnett answers this question by showing how Chinese religious ideas and practices have developed and changed over the millennia. Only by understanding this broader picture can one come to understand the complex spiritual and religious situation of modern China. Accordingly he explores the influences of Buddhism, Confucianism and the Jesuits; he looks at the Ming Dynasty and the rise of the Manchus; he assesses the motivations behind Mao, Deng Xiaoping and the current communist and commercial regime. Why is an atheistic leadership seeing a widespread religious revival, across several faiths? What is the future for the religions of China?
