Mammalogy George A. Feldhamer, Lee C. Drickamer, Stephen H. Vessey, Joseph F. Merritt, Carey Krajewski

Reflecting the expertise and perspective of five leading mammalogists, the fourth edition of *Mammalogy: Adaptation, Diversity, Ecology* significantly updates taxonomy, includes a new chapter on mammalian molecular phylogenetics, and highlights several recently described species.

There are close to 5,500 species in the class Mammalia, including the blue whale—the largest animal that has ever lived—and the pygmy shrew, which weighs little more than a penny. The functional diversity of mammals has allowed them to play critical roles in every ecosystem, whether marine, freshwater, alpine, tundra, forest, or desert.

Many mammal species are critically endangered and present complex conservation and management challenges. This book touches on those challenges, which are often precipitated by overharvesting and habitat loss, as well as emerging threats, such as the impact of wind turbines and white nose syndrome on bats and chronic wasting disease on deer.

Among the updates and additions to the fourth edition of *Mammalogy* are numerous new photos, figures, and cladograms, over 4,200 references, as well as

- A completely new chapter on mammalian phylogeny and genomics
- Current taxonomy—including major changes to orders, suborders, and superfamilies of bats and rodents
- An explanation of the recent inclusion of whales with terrestrial even-toed ungulates
- Updates on mammalian structural, functional adaptations, and fossil history
- recent advances in our understanding of phylogeny, biogeography, social behavior, and ecology
- A discussion of two new orders and thirteen newly recognized extant families
- Reflections on the implications of climate change for mammals
- Thorough examinations of several recently described species, including Durrell's vontsira (*Salanoia durrelli*) and the Laotian rock rat (*Laonastes aenigmamus*)
- An explanation of mammalian biomechanics, such as that seen in lunge feeding of baleen whales
- Breakout boxes on unique aspects of mammals, including the syntax of bat songs, singing mice, and why there are no green mammals (unless we count algae-covered sloths)

Maintaining the accessible, readable style for which Feldhamer and his coauthors are well known, this new edition of *Mammalogy* is the authoritative textbook on this amazingly diverse class of vertebrates.

From reader reviews:

Janet Roldan:

Book is written, printed, or highlighted for everything. You can understand everything you want by a book. Book has a different type. To be sure that book is important issue to bring us around the world. Adjacent to that you can your reading skill was fluently. A publication Mammalogy will make you to possibly be smarter. You can feel more confidence if you can know about almost everything. But some of you think this open or reading some sort of book make you bored. It's not make you fun. Why they may be thought like that? Have you searching for best book or suitable book with you?

Wm Schroeder:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, the particular best subject for that? Only you can be answered for that query above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't want do that. You must know how great and also important the book Mammalogy. All type of book would you see on many sources. You can look for the internet sources or other social media.

Lisa Mercado:

Is it you who having spare time subsequently spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Mammalogy can be the reply, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these books have than the others?

Angela Souther:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or even make summary for some publication, they are complained. Just very little students that has reading's heart or real their hobby. They just do what the trainer want, like asked to the library. They go to there but nothing reading significantly. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Mammalogy can make you experience more interested to read.
