Science K-8: An Integrated Approach (11th Edition)

Edward Victor, Richard D. Kellough, Robert H. Tai

Science K-8: An Integrated Approach (11th Edition) Edward Victor, Richard D. Kellough, Robert H. Tai
Packed with the science content future teachers must know, and based on the premise that integrated learning by inquiry is the cornerstone of effective science teaching, the eleventh edition of this classic again focuses on the four developmental components of both teaching and learning—the *why*, *what*, *how*, and *how well* of teaching. Unique to this text are complete content outlines covering the big ideas of life, earth, and physical science. Teachers can use these outlines and sequence concepts to build science units with an assurance they will be complete. Content correlates with NSES standards, while being ideally balanced between the attention span of kindergartners and the genuine interest of eighth graders, addressing the full range of learners in between. Includes thorough coverage of the relationship among curriculum standards, assessment, and high-stakes achievement testing. Thorough, current science content fills in any gaps in students fundamental science knowledge and readies them for current science curriculum standards. Includes up-to-date lists of science-oriented websites. For future elementary and/or middle school teachers.
