Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) Roy Levy, Robert J. Mislevy

A Single Cohesive Framework of Tools and Procedures for Psychometrics and Assessment

Bayesian Psychometric Modeling presents a unified Bayesian approach across traditionally separate families of psychometric models. It shows that Bayesian techniques, as alternatives to conventional approaches, offer distinct and profound advantages in achieving many goals of psychometrics.

Adopting a Bayesian approach can aid in unifying seemingly disparate and sometimes conflicting ideas and activities in psychometrics. This book explains both how to perform psychometrics using Bayesian methods and why many of the activities in psychometrics align with Bayesian thinking.

The first part of the book introduces foundational principles and statistical models, including conceptual issues, normal distribution models, Markov chain Monte Carlo estimation, and regression. Focusing more directly on psychometrics, the second part covers popular psychometric models, including classical test theory, factor analysis, item response theory, latent class analysis, and Bayesian networks. Throughout the book, procedures are illustrated using examples primarily from educational assessments. A supplementary website provides the datasets, WinBUGS code, R code, and Netica files used in the examples.

From reader reviews:

Geraldine Davis:

The book Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) will bring that you the new experience of reading some sort of book. The author style to spell out the idea is very unique. When you try to find new book to study, this book very suitable to you. The book Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) is much recommended to you you just read. You can also get the e-book in the official web site, so you can more easily to read the book.

Florence Booth:

Playing with family in a park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, then why you don't try thing that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences), you can enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't obtain it, oh come on its identified as reading friends.

Samuel Brooks:

This Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) is completely new way for you who has intense curiosity to look for some information because it relief your hunger details. Getting deeper you into it getting knowledge more you know or you who still having small amount of digest in reading this Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences) can be the light food in your case because the information inside this kind of book is easy to get by simply anyone. These books acquire itself in the form which is reachable by anyone, yeah I mean in the e-book type. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there isn't any in reading a reserve especially this one. You can find actually looking for. It should be here for you. So , don't miss the idea! Just read this e-book kind for your better life and also knowledge.

Justin Oliver:

In this era which is the greater man or who has ability in doing something more are more valuable than other. Do you want to become certainly one of it? It is just simple approach to have that. What you have to do is just spending your time little but quite enough to have a look at some books. One of several books in the top collection in your reading list is usually Bayesian Psychometric Modeling (Chapman & Hall/CRC Statistics in the Social and Behavioral Sciences). This book and that is qualified as The Hungry Mountains can get you closer in getting precious person. By looking way up and review this reserve you can get many advantages.
