ISE Prototype of Japanese Architecture

Kenzo Tange, Noboru Kawazoe

ISE Prototype of Japanese Architecture Kenzo Tange, Noboru Kawazoe

Bruno Taut ranks the Ise Shrine with the Parthenon in architectural importance. John Burchard, in his preface, characterizes Ise as "one of the great architectural achievements of history. "I suppose," he comments "Ise has many lessons for contemporary architects once they get over being embarrassed by it." The Ise Shrine, situated some 270 miles west of Tokyo, is both old and new. The shrine dates from at least 685 A.D. but every twenty years it is completely rebuilt. Each rebuilding -- there have been 59 so far -- is scrupulously undertaken to guarantee an exact and identical reproduction of the preceding shrine. In 1953, after the most recent renewal but prior to the transfer of religious objects, not only were the authors allowed to inspect the prohibited area -- it is ringed by four fences and contains the most important buildings -- but they were granted unprecedented permission to photograph it.
