Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research)

Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research)

Beginning with an overview of data and concepts developed in the EU-project HABIT-CHANGE, this book addresses the need for sharing knowledge and experience in the field of biodiversity conservation and climate change. There is an urgent need to build capacity in protected areas to monitor, assess, manage and report the effects of climate change and their interaction with other pressures. The contributors identify barriers to the adaptation of conservation management, such as the mismatch between planning reality and the decision context at site level. Short and vivid descriptions of case studies, drawn from investigation areas all over Central and Eastern Europe, illustrate both the local impacts of climate change and their consequences for future management. These focus on ecosystems most vulnerable to changes in climatic conditions, including alpine areas, wetlands, forests, lowland grasslands and coastal areas. The case studies demonstrate the application of adaptation strategies in protected areas like National Parks, Biosphere Reserves and Natural Parks, and reflect the potential benefits as well as existing obstacles. A general section provides the necessary background information on climate trends and their effects on abiotic and biotic components. Often, the parties to policy change and conservation management, including managers, land users and stakeholders, lack both expertise and incentives to undertake adaptation activities. The authors recognise that achieving the needed changes in behavior – habit – is as much a social learning process as a matter of science-based procedure. They describe the implementation of modeling, impact assessment and monitoring of climate conditions, and show how the results can support efforts to increase stakeholder involvement in local adaptation strategies. The book concludes by pointing out the need for more work to communicate the cross-sectoral nature of biodiversity protection, the value of well-informed planning in the long-term process of adaptation, the definition of acceptable change, and the motivational value of exchanging experience and examples of good practice.

From reader reviews:

Reinaldo Downs:

The reason? Because this Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will shock you with the secret this inside. Reading this book beside it was fantastic author who all write the book in such remarkable way makes the content within easier to understand, entertaining means but still convey the meaning fully. So , it is good for you because of not hesitating having this ever again or you going to regret it. This unique book will give you a lot of rewards than the other book possess such as help improving your expertise and your critical thinking technique. So , still want to postpone having that book? If I had been you I will go to the reserve store hurriedly.

Jaclyn Warner:

Many people spending their moment by playing outside having friends, fun activity having family or just watching TV the whole day. You can have new activity to invest your whole day by reading through a book. Ugh, do you consider reading a book can actually hard because you have to accept the book everywhere? It fine you can have the e-book, having everywhere you want in your Touch screen phone. Like Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research) which is having the e-book version. So , why not try out this book? Let's see.

Nancy Lord:

This Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research) is completely new way for you who has fascination to look for some information mainly because it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research) can be the light food for you because the information inside this particular book is easy to get simply by anyone. These books produce itself in the form and that is reachable by anyone, sure I mean in the e-book application form. People who think that in publication form make them feel sleepy even dizzy this publication is the answer. So there is no in reading a book especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss it! Just read this e-book kind for your better life and knowledge.

Jessica Seymore:

Don't be worry when you are afraid that this book will probably filled the space in your house, you will get it in e-book means, more simple and reachable. This specific Managing Protected Areas in Central and Eastern Europe Under Climate Change (Advances in Global Change Research) can give you a lot of good friends because by you investigating this one book you have issue that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This reserve offer you

information that might be your friend doesn't understand, by knowing more than other make you to be great people. So , why hesitate? Let me have [Managing Protected Areas in Central and Eastern Europe Under Climate Change \(Advances in Global Change Research\)](#).
