## **Right Brain Math: A Fun, Easy, Visual Approach to Math** Thomas Biesanz

Right Brain Math is a new revolutionary way to learn math. Many kids, parents and teachers struggle with the current grinding repetition drill approach. Right Brain Math fits the way many kid's minds work, focusing on visual and auditory patterns. It is designed for kids to EXPERIENCE number patterns. Examples of experiential play are the EZ Times Table, Number Circles, and Tic-Tac-Toe Squares. This 3D view allows kids to take ownership and resistance to math disappears. Right Brain Math bypasses many of the misunderstandings caused by language and kids SEE patterns in numbers directly themselves. This also allows older struggling students to start over. Numbers ARE PATTERNS. Many games and puzzles are based on patterns, so Right Brain Math reveals the intrinsic patterns in numbers in a fun fascinating way that kids (and parents and teachers) experience as cool. The Seamless structure of the EZ Times Table allows seamless connections from addition, subtraction, multiplication, division, factors, squares, prime numbers, and more. They find it easy to put the patterns of the ones and tens-digits together to create the times tables themselves. Students play comfortably with larger and larger numbers as they focus on the patterns.
