One of the reason magnetism is so powerful is probably because it activates our enteric brain, corresponding to the solar plexus and our hara center. Most of existing therapies and methods work as there it is just one brain, the brain in our head that rules our body, but this is not true. If we want true healing we must activate a second brain that many times we even don't suppose to have. The two centers of solar plexus and hara are connected, and normally for stabilizing the person in the hara we must pass through a procedure of activation at the height of the solar plexus. You must realize that the enteric brain controls the majority of the functions of the physical body and, above all, that is it which created and which continues to nourish the brain¹. If it ceases to do so a person becomes incapable of activity, he has a headache or feels drowsy and cannot think any more. Cutting-edge research is currently investigating how the second brain mediates the body's immune response; after all, at least 70 percent of our immune system is aimed at the gut to expel and kill foreign invaders.
