Attention: The novice in Spanish should start with SmartSpanish - Introduction to Spanish, Vol.1 and Vol.2 first, to study the basic grammar, conjugation and vocabulary that we observed you need in order to get a perfect foundation.

Learning Spanish requests that you learn to speak Spanish (Vol.1 and Vol.2) and that you learn to understand it (SmartSpanish Audio CDs Beginner)

If you want to enter a conversation in Spanish without any training to listen to it, you will not be able to get what is coming back to you. Then your Spanish studies will be worth nothing. On the other hand, even if you feel hesitant to speak Spanish, you can have a conversation saying just yes or no , as long as you understand the other person. That is why to develop listening skills is so important. With Smart Spanish you will develop two-way conversation skills.

The difference between the audio CDs and the CDROM - also available on amazon.co.uk, is that the Audio CDs can be played anywhere. The CDROM is only for the computer (Windows and Mac). It contains all three levels and some extras, as well as the videos of the interviews on which the lessons are based (to see people when they speak always helps.)
